

Cable Adapter

This cable adapter is to be used with the UH200D and UH400 plug-on transmitters with T-powered microphones. It will protect a T-power mic against the 48V phantom power setting in the transmitter while allowing normal operation. The transmitter should be set to the 15V position for best operation and minimum current drain.

This is not a "universal" adapter and is intended for use with the Lectrosonics UH200D and UH400 transmitters only.
